

PRAESIDIUM

Developing Effective Internal Feedback Systems to Identify Abuse Risk

How to get started.

- Collect data related to preventing abuse
- Compile risk management data in one central location
- Use standard mechanisms to collect and compile information

How to analyze data for abuse risk.

- Track specific variables within reports
- Look for emerging patterns

How to develop an action plan.

- Identify methods to prevent reoccurrence
- Promote a Culture of Safety
- Create a healthy reporting climate
- Eliminate potential barriers to reporting

Not sure where to start? We can help.
